

BOUNDARY BREAKS

Riesling Late Harvest/Ice Wines

Riesling dessert wine made from grapes left out in the vineyard into the winter to de-hydrate under the steady rays of the sun. For Ice Wine we pick the fruit for when temperatures reach 15 degrees F or lower.

WHAT DO THE NUMBERS, "239, 198, 110, 90", REFER TO? When you choose to plant grapes, the plant nurseries that sell vines offer several choices within a particular variety. Each specific variation within a grape variety is referred to as a "clone," and it is given a number like #239 or #198. Within in a particular set of environmental conditions—or "terroir"—some clones are expected to do better than others. In the Finger Lakes, there is no consensus on what the "ideal" clone is for the terroir. When Boundary Breaks began planting its vineyards in 2009, it chose to plant five different Riesling clones to see how they each expressed themselves at the Boundary Breaks site.
