

# BOUNDARY BREAKS

## DID YOU KNOW?

The Finger Lakes region has been famous for making sparkling wines for more than 150 years.

--The grapes that made the sparkling wines famous were native and hybrid grapes which ripened during a short growing season and also retained their acidity.

## 2023 Vignette Bubbly

### WHAT MAKES VIGNETTE BUBBLY SPECIAL

- This wine is a descendant of some of the early sparkling wines made in the last part of the part of the 19<sup>th</sup> century. Sparkling wines made by the Pleasant Valley Wine Company won gold medals in competitions in Paris, Vienna and Brussels.
- For this sparkling wine, we are using two popular hybrid grape varieties: Traminette and Vidal.
- The result is a wine that is fresh, lively and full of complex fruit notes.

### 2023 VINTAGE NOTES:

The 2023 vintage included extended September and October growing conditions that enabled the fruit to reach physiological ripeness. Harvests were later than usual, which allowed the fruit to develop flavor components that contribute to more complex, ageable wines.

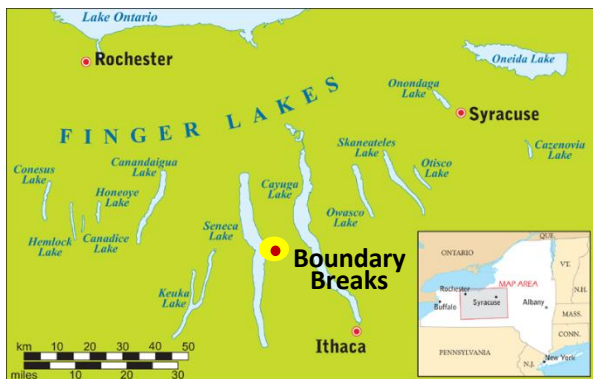

### TECHNICAL NOTES

**pH:** 3.42  
**Bottling Date:** May, 2024  
**Cases Produced:** 1,000; **SRP:** \$18.95

### SELLING POINTS: VIGNETTE BUBBLY

At one time, sparkling wines from New York State were some of the best-selling sparkling wines made in the United States. The cool climate of the region makes it ideal for this style of wine.

**ABOUT US:** Boundary Breaks focuses on cool-climate grape varieties--principally Riesling, Gewurztraminer and Cabernet Franc. We began planting vines in 2009 and released our first vintage in 2013. Our wines are sold throughout the US and abroad.

**WHAT MAKES OUR WINES DISTINCTIVE:** Our wines possess a powerful flavor profile. We achieve this in the challenging cool climate of the Finger Lakes by ensuring our fruit achieves a maximum level of ripeness in the vineyard. Our vineyards are located in a unique microclimate near the shoreline on the east side of Seneca Lake. The lake is more than 700 feet deep and keeps our site warmer during the coldest periods of winter. Our western-facing vineyard slopes also benefit from extended afternoon sun.
